

James C. Frangos' office is pleased to offer a state-of-the-art digital scanning technology that allows us to view the inside of your eye without the use of dilation drops. The OPTOMAP allows our doctor to evaluate your retina for problems such as Macular Degeneration, Glaucoma, Retinal Holes, Retinal Detachments, Hypertensive / Diabetic Retinopathy and much more. The scanning system is completely safe for children and adults. It allows you the opportunity to see inside of your eyes just as the doctor sees it!

We recommend that all patients have a thorough examination of their retina each year. There is an additional fee of \$29.00 for the OPTOMAP scan. In most cases, this scan is not covered by insurance. Insurance plans generally provide you with basic vision examination coverage but do not include advanced disease detection procedures like the Optomap.

Dilation is still required in cases such as diabetes and dilation may be required in cases such as cataracts or macular degeneration.

Dilated Exam

1. Blurred vision for 4-6 hours
2. Light sensitivity for 4-6 hours
3. Longer office visit to wait for drops to take effect
4. Only the doctor can see the retina

OPTOMAP Exam

1. No blurred vision
2. No light sensitivity
3. Scan takes less than 2 minutes
4. Digital image that can be reviewed / compared each year
5. You can see your retina

_____ I elect to have a digital scan of my retina today (\$29.00)

_____ I prefer a dilated exam of my retina (no additional fee)
