

COCHECO EYE CARE

C. ANDREW FRANGOS, OD

A MEMBER OF *VISION SOURCE*

The **optomap**® Retinal Exam:

- ✓ **Is fast, easy, and comfortable**
- ✓ **May alleviate the need for dilation**
- ✓ **Provides a permanent record for annual review**

An **optomap** Exam gives us a panoramic image of the surface of your retina. These images help the doctor assess the health of your eyes and check for conditions including macular degeneration, glaucoma, and retinal detachments. *These problems can threaten vision without warning or symptoms.*

Serious health problems unrelated to the eye such as diabetes, hypertension, heart disease, some cancer, and auto-immune disorders, can also be viewed with an **optomap** Exam. Early detection could help save your vision or your life.

The cost of the **optomap** Exam is \$35

I understand the **optomap** retinal exam will be performed today and do not have any questions.
